

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. The state rate for births (exclusive of stillbirths) has increased from 18.8 per 1,000 to 21.4 per 1,000. This represents an increase of 16,125 births.

The total number of births for 1920 is 124,303.

Mahoning County, with a rate of 28.6 per 1,000 is the highest, and Harrison County, with a rate of 15.1, is the lowest.

Williams County, with a decrease of .8 per 1,000, shows the greatest decrease, and Madison County, with an increase of 6.8 per 1,000, shows the greatest increase. Nine counties show a decrease.

East Youngstown, with a rate of 45.2 per 1,000, has the highest city rate, and Cleveland Heights, with a rate of 4.0 per 1,000, has the lowest city rate. Fifteen cities show a decrease.

The birth rate for the year 1920 was compiled on the late census figures, which give the estimated population of Ohio, July 1, 1920, as 5,810,453.

DEATHS.

The death rate for the state is 12.7 per 1,000, which is exactly the same as the rate for the year 1919.

The smallest decrease is in the diseases of the skin, which is .01 per 100,000, and the greatest decrease is in the general diseases, which is 21.79 per 100,000.

The greatest single cause of death was organic disease of the heart, which was responsible for 8,267 deaths. This is an increase of 608 deaths over the year 1919. Tuberculosis was next in order, with 5,971 deaths, this being a decrease of 571 deaths over the year 1919.

*From 1803 to 1850 the Secretary of State was elected by the General Assembly.

†The Democrat party of today claims lineal descent from the first Republican party, with President Jefferson as its founder. Authorities differ as to the date when the party dropped the name Republican and assumed that of Democrat, it being ascribed to various dates between 1805 and 1820.

‡Political parties were disorganized at the time of the election of John Q. Adams. He claimed to be a Republican, as Jefferson, but his doctrines were decidedly Federalistic. The opposition to his administration took the name of Democrat, and elected Jackson President in 1828.

Fourteenth Federal Census

STATISTICS OF POPULATION

By Counties and Minor Civil Divisions

1920 - 1910 - 1900

(651)

POPULATION—OHIO

NUMBER OF INHABITANTS, BY COUNTIES AND MINOR CIVIL DIVISIONS.

TOTAL POPULATION, INCREASE, AND DISTRIBUTION.

POPULATION OF THE STATE—Ohio, formerly a part of the Northwest Territory, was admitted to the Union as the seventeenth state in February, 1803. According to the Fourteenth Census, taken as of January 1, 1920, its population is 5,759,394, which represents an increase of 992,273, or 20.8 per cent, over the 1910 figure. During the same period the population of the United States increased by 14.9 per cent. The following summary shows the population of Ohio from 1800 to 1920, inclusive, together with the number and per cent of increase for each decade, in comparison with the per cent of increase for the United States as a whole:

COUNTIES—Ohio has 88 counties, of which 49 show increases and 39 decreases as compared with 1910. (See Table 1.) No changes in county boundaries have been made since 1910.

DENSITY OF POPULATION—The total land area of the state is 40,740 square miles. The average number of inhabitants to the square mile in 1920 is 141.4 (see Table 1), as against 117 in 1910 and 102.1 in 1900.

MINOR CIVIL DIVISIONS—The political units into which the counties are divided are collectively termed "minor civil divisions." The counties of Ohio are made up of 1,401 primary divisions, comprising 1,339 townships, 9 cities, and 3 villages. The secondary divisions, 819 in number, consist of 94 cities, and 725 incorporated villages. Each of 14 cities and 30 villages is co-extensive with the township in which located, and each of 15 cities, 1 town, and 68 villages comprises parts of 2 or more townships. (See Table 2.)

CITIES—Ohio has 94 cities, of which Cleveland, with a population of 796,841, is the largest. Seven cities have more than 100,000 inhabitants each. Of these, Akron shows by far the greatest rate of growth during the past decade, having more than trebled its population. (See Tables 3 and 4.)

The following summary shows, for each city having 25,000 or more inhabitants in 1920, the population at each census for which figures are available, together with the number and per cent of increase during the preceding decade:

URBAN AND RURAL POPULATION—The Census Bureau defines urban population as that residing in cities and other incorporated places having 2,500 inhabitants or more and rural population as that residing outside such incorporated places.

The following summary presents, for the last three censuses, figures showing the urban and rural population of the state distributed among places grouped according to specified limits of population. The classification for each census is based upon the population of the various places as shown by the returns of that census. Consequently the territory comprised within any one class of cities or that designated as urban or as rural does not remain fixed, because any given place may, through the growth or the decline of its population, pass from one class to another at successive censuses. The proportion of the population of Ohio living in places of 2,500 or more increased from 48.1 per cent in 1900 to 55.9 per cent in 1910 and to 63.8 per cent in 1920.
